

Condition Monitoring Equipment

Hydraulic Energy Australia firmly believes in condition monitoring to allow informed judgements of equipment life cycle.

Thankfully, our clever technicians have incorporated the latest conditioning monitoring technology within our equipment, designed and developed in-house.

We provide condition monitoring solutions for hydraulic oils, lubrication oils, water glycol fluids, water, diesel and environmental fluids. We source products from leading manufacturers including Hydac, Parker, Pall, Rexroth and more.

Equipment

Our range of condition monitoring equipment includes:

- ▶ Contamination sensors
- ▶ Aqua Sensors
- ▶ Fluid analysis equipment
 - Laser Particle Counters
 - Patch Test Kits
 - Water Test Kits
- ▶ Data loggers
- ▶ Flowmeters
- ▶ Pressure Transmitters
- ▶ Temperature Transmitters
- ▶ Level Transmitters

Documentation and Calibration certificates are available upon request.
