

Pig's Tail

Hydraulic Energy Australia is the WA distributor for Pig's Tail, a HDPE (high density polyethylene) protective wrapping.

Designed for easy installation to existing hydraulic hoses and cable protection, Pig's Tail safeguards against wear and damage caused by misuse, poor maintenance, or aggressive working environments.

Manufactured from high molecular weight extrusion grade polyethylene, they exhibiting extremely good environmental stress crack resistance (ERS) and conform with Australian Standard AS2070 - plastic material for food consumption use.

Pig's Tail

Our protective wrapping offers the following benefits:

- ▶ Developed to increase the service life of hydraulic hoses
- ▶ Electrical cable protection
- ▶ Manufactured from tough HDPE for ultimate protection against abrasive wear and crushing damage
- ▶ Unique rounded edges facilitate installation and reduce risk of exposed sharp edges
- ▶ Wide range of sizes suits most hose diameters
- ▶ Can be used to protect a single hose or to bundle hoses/ cables together
- ▶ Spiral cut for ultimate flexibility
- ▶ Resistant to chemical attack and suitable for use in the most aggressive environments
- ▶ Suitable for use with equipment operating across a wide temperature range (-10°C to 90°C)
- ▶ Fire resistant and anti-static versions available for use in sensitive environments
- ▶ Suitable for use with all hydraulic fluids including glycol and phosphate ester based products

Supported by our supplier partners' high production manufacturing capabilities, and with an extensive internal inventory on hand, we guarantee availability on demand.
